Background on Golf Products:

The Brand of Golf Products used in the packages is Orlimar. Orlimar uses bi-metal, tri-metal and titanium technologies to create long-hitting clubs. Their drivers feature Aldila NVS graphite shafts, Golf Pride Tour Velvet grips, and loft angles between 8.5 and 12.5 degrees. The company's irons and wedges are forged from carbon steel and they are available with both steel and graphite shafts. The irons and wedges also come with Golf Pride New Decade grips. Anti-slice graphite-shaft hybrids are also available. Orlimar putters are designed with core-weighting technology for stability and balance.

Some perks to Orlimar products include; the size, design and weight balance of the Orlimar drivers make them incredibly long off the tee, even without an overly powerful swing. The accuracy with drivers and fairway woods is comparable to smaller and lighter brands, and the forged irons are ideal for tighter fairways and landing areas. The peripheral balance and smooth motion of the putters suits both beginning and veteran players.
